

MTMS

improves all aspects of care

“The medication record helps give the doctors a better picture of what’s going on with me.”

improves well-being

“Having the help of a person who specializes in medications, which impacts me on a daily basis-putting drugs in my body.”

improves confidence

“I have a source of intelligence guiding me.”

A partnership between you and your pharmacist will...

- Optimize your therapeutic outcomes
- Decrease the likelihood of adverse effects with your medications
- Enhance your overall understanding
- Improve your treatment outcomes
- Promote the safe and effective use of medications
- Ultimately lead to overall better care

Medication Therapy Management Services

Consistent, efficient, and effective medication-related care for patients

Nobody knows more about your medication than your pharmacist...

Medication Therapy Management Services is a service that your pharmacist provides to improve treatment outcomes for patients by optimizing the safe and effective use of medications. MTMS promotes collaboration among patients, pharmacists, physicians, and other health care providers.

Along with your other health care providers, your pharmacist will review each of your medications and make recommendations that ensure your medication is appropriate and effective in achieving treatment goals, that your medication is safe, and that your plan is convenient to your lifestyle. Your pharmacist can help you evaluate and manage your medication in a safe and effective way.

When you begin MTMS your pharmacist will:

- Review your important medical history
- Review your medication profile
- Make recommendations for improving health outcomes
