

Help us fight pharmacy crime!

Since 2003, nearly 1,000 crimes a year have been committed against pharmacies including robbery, burglary, and fraud.

And it is estimated that prescription drug crime is the source of 25–30 percent of the country's drug problem, according to the National Association of Drug Diversion Investigators.

NCPA, along with FBI LEEDA, the Community Pharmacy Foundation, and RxPATROL® and its partners have created a new initiative called "Protect Your Pharmacy Now!" to educate pharmacists on steps to protect themselves from crime, including prescription drug theft.

But, we need your help. Please encourage your local pharmacies to contact you for help with security tips and to report any suspicious activity.

For more information on the "Protect Your Pharmacy Now!" initiative, visit www.ncpanet.org or www.rxpatrol.org.
