Pharmacy Foundation

Background

The Community Pharmacy Foundation (CPF) is a nonprofit organization dedicated to advancing community pharmacy practice and patient care delivery through grant funding and resource sharing. The CPF first awarded grants in 2002 with funds from a class action, pre-trial partial settlement against discriminatory pricing affecting US community pharmacies. Since that time the CPF has awarded 151 grants totaling \$7,172,583.

Objectives

- Describe the SCOPE of completed grants funded by the CPF from 2002 through June 2015.
- Describe the IMPACT of completed grants funded by the CPF from 2002 through June 2015.

IRB/Funding

University of Minnesota Human Research Protection Program (IRB# 1507E76723) and funded by the CPF.

Conclusions

The results showed a shift in funding from a therapeutic focus towards value-based medication management. CPF also significantly impacted personal/professional grantee advancement and community pharmacy practic
